Objectives:

1. Provide participants with state-of-the-art knowledge about innovative research and practice related to guideline implementation within the evidence ecosystem
2. Clarify opportunities and responsibilities for implementing EBHC and high-quality patient care at international, country, and local levels

Target groups:

1. Guideline developers, implementers, and improvers: clinicians, researchers, educators, and innovators interested in EBHC, quality improvement, and implementation research
2. Decision- and policymakers in Norway, responsible for patient safety and quality in health care
3. Patients/consumer-advocates involved in health care

Conference Program

0900-0915 Welcome

Tone Ikdahl, Director at Lovisenberg Diaconal Hospital, will open the conference and explain why caring for patients with evidence is a core value and mission

0915-0935 MAGIC that is happening to enhance the evidence ecosystem

Professor Per Vandvik, CEO at MAGIC, will introduce the program, based on a MAGIC journey to uncover why enhanced guideline dissemination adaptation and implementation is key moving forward, including living evidence and other stuff.

0935-1005 Implementing evidence and the evidence ecosystem with seriousness

Professor Jeremy Grimshaw, holder of the Canada Research Chair in Health Knowledge Transfer and Uptake, will present the state of the art for implementation research, explain why it is so difficult to address evidence-practice gaps, and share his vision on future challenges for implementation strategies to promote evidence-based care

1005-1020 Coffee break

1020-1040 Lessons on implementability and adaptability for international guidelines

Lisa Askie, Methods Lead and Scientist at WHO's Quality, Norms and Standards department, will present approaches to facilitate uptake of WHO guidelines worldwide, within an evidence ecosystem that spans international, regional, and national levels.

1040-1100 The way forward to adapting living guidelines

Yang Song, a researcher at the Autonomous University of Barcelona, will present advances in guideline adaptation, exemplified through MAGIC supporting WHO member states in adapting WHO Covid-19 living guidelines to enhance country impact

1100-1120 Learning from established national evidence ecosystems

Professor Craig Ramsay, Director at the Health Services Research Unit at the University of Aberdeen, will summarize the experience gained by the Translation Research in a Dental Setting (TRiADS) Program on building links between guideline development, implementation, and measurement as part of the Scottish Dental Clinical Effectiveness Program.

1120-1200 How can evidence ecosystems be greater than the sum of their parts?

Professor Michael Bretthauer will facilitate this plenary discussion, with reflections from the audience and speakers on how to enhance the evidence ecosystem so that those trustworthy guidelines can make a true impact on policy and practice.
