

MAGIC and Lovisenberg

Enhancing the evidence ecosystem, for increased value and reduced waste in health care

M

Nov 11
12pm-3pm CET
@Lovisenberg

Arranged by
Lovisenberg Diaconal
Hospital Trust in
collaboration with MAGIC

Free of charge
Max 200 participants
in auditorium but
unlimited on Zoom

Objectives:

1. Provide participants with state-of-the-art knowledge about new standards, methods and tools for evidence-based health care (EBHC), shared decision-making and implementation science, such as decision-support in the electronic health record.
2. Understand that living evidence and guidance is here to stay, following COVID-19.
3. Understand why MAGIC and Lovisenberg have partnered to enhance the evidence ecosystem and how they will work together.
4. Clarify opportunities and responsibilities for implementing EBHC and high-quality patient care in Norway in the evidence ecosystem.

Target groups:

1. Decision- and policy-makers in Norway, responsible for patient safety and quality in health care (Dept of Health, Health Directorate, Norwegian Medical Association, Regional Health Authorities, Universities).
2. Patients/consumer-advocates involved in health care.
3. Clinicians, researchers, educators and innovators interested in EBHC, and how they can join the evidence ecosystem, through the MAGIC Lovisenberg partnership.

Conference Program

1200-1210 **Welcome and why we are here today + MUSIC**
Tone Ikdahl, LDS

1210-1245 **How is research at LDS enhancing the evidence ecosystem?**

Introduction Anners Lerdal, Research Director LDS.

Professor Alexandra Havdahl will present her work for The Lancet Commission on the Future of Care and Clinical Research in Autism.

Professor Maren Falch Lindberg will present the Multi-knee trial: innovations in evidence-based treatment for patients suffering from pain following total knee arthroplasty.

STATE OF THE ART

1245-1315 **MAGIC in a digital and trustworthy Evidence Ecosystem: Why bother?**

Professor Vandvik will chair the session and introduce the remaining program. A story starting with his accidental discovery of evidence-based medicine in 2003 to realize remaining global challenges in EBHC, addressed through MAGICapp and a digital and trustworthy evidence ecosystem, now to be enhanced in an exciting partnership with Lovisenberg Diaconal Hospital: A journey of MAGIC dimensions!

Professor Agoritsas and Dr. Brandt will demonstrate how trustworthy decision support is key to succeed with safe and high-quality health care. This is never enough, which is why an enhanced digital and trustworthy evidence ecosystem is needed, ideally with living evidence and guidance as seen through the COVID-19 pandemic.

Senior Researcher Stijn van de Velde will present how MAGIC and Lovisenberg aims to demonstrate increased value and reduced waste in health care, inviting Norwegian hospitals and other actors to further enhance the evidence ecosystem (the E3 project).

1315-1330 **Coffee break**

1330-1430 **Is Living Evidence and Guidance here to stay?**

An interactive Zoom session where global leaders will share their insights on living evidence and guidance to inform panel debate. Chair Thomas Agoritsas (MAGIC) will moderate discussions.

Professor Julian Elliott, head of Living Evidence Consortium, will introduce what it is and present how Australia is pioneering living guidelines in health care, with Cochrane as dedicated partner.

Dr. Janet Diaz, Lead, Clinical Team for COVID-19 Response at WHO, will present why and how they entered the living guideline era, now transforming guidance across the organization.

Professor Gillian Leng, CEO at NICE, will present their new strategy and why moving to living guidelines represents a pillar, materialized through COVID-19.

Dr. Fiona Godlee, Editor in Chief at BMJ, will present advances in living evidence and guidance and how these challenge scientific publishers.

What about Norway in this enhanced evidence ecosystem?

1430-1500 Panel discussion chaired by professor Michael Bretthauer, with reflections from Norwegian actors in the Ecosystem on:

1. Trustworthy guidelines in Norway: Available with impact on delivered care, and coming from where? Who is responsible for what?
2. Should Norway also move to living evidence and guidance now?

Leaders in Norwegian health care, research and education have been invited to the panel

Point of care perspective.

Education perspective.

Specialist health care perspective.

Research perspective.

Guideline developer perspective.

Public health perspective.
